

CED Computing Center –

HOW TO: Install Sassfras Keyserver

FOR Apple Macintosh LAPTOPS

2007

- 1) Ensure that you are wirelessly connected to CEDPROXIM. If you are not, please check with the lab monitors at Wurster Rm 477.
- 2) Get the “K2 Sassfras Installer” disc from Wurster 477 and insert it into your machine.
- 3) Double-click on the k2v60arch.smi file and run the application
- 4) It will create a mount on your hard drive. When you open finder you should see it as “K2 v6.0”.
- 5) Double click on the “Installers” folder è “Client Installers” folder
- 6) Double click the “K2Client.sea” application (the one with the blue icon).
- 7) When the setup asks you for KeyServer information:
 - a. For “Host DNS Name or IP Address type: **169.229.154.251**
- 8) There will be an warning message:OS X installed successfully but Sassfrass can not be run in OS 9...” Just click ok and ignore this warning message.
- 9) After installation has completed, reboot the machine.
- 10) Go Applications è Sassfras K2 è Client è KeyVerify
- 11) If Keyserver asks you for a password, enter your name as Login name. The password is: **gaudi**
- 12) A window should pop up indicating that a valid KeyServer Connection exists. If not, troubleshoot using the directions below. Or see the lab monitors in Wurster 477. Alternatively, you can also email ced_computer_help@lists.berkeley.edu

:: TROUBLESHOOTING ::

[when KeyServer just isn't connecting and you want to take care of it yourself]

- 1) Verify that you connected to CEDPROXIM (actually, any old internet connection will do. As long as you can access www.berkeley.edu or www.cnn.com you should be fine).
- 2) Open a Finder window and go to your Applications folder
- 3) Find the “Sassfras K2” folder è “Client” folder è click on “KeyAccess Setup”
- 4) When KeyAccess Setup opens up, ensure that the “Connection:” is: 169.229.154.251
- 5) Click Logon. Keyserver should logon.
- 6) If Keyserver gives you an error saying “Access Denied”, go to your System Preferences è Sharing, and then click on the Services tab. Write down your Computer Name, and bring this information to Wurster 477, or email it to us at ced_computing_help@lists.berkeley.edu.
- 7) If you continue to have problems, see the lab monitors in Wurster 477. Alternatively, you can also email ced_computer_help@lists.berkeley.edu

* If you experience any problems, please see the Computing Assistants office at Wurster Rm. 477.
